

A feature passed on to a living thing from its parents

Something passed on from parent to offspring

An animal with a backbone

To move to another place to find better climate, food, or a mate; the movement from a cold place to a warm place and back again

The stage in an insect's life after it hatches from the egg

To spend winter resting; body systems slow down to save energy

The stage in an insect's life between larva and adult

An animal without a backbone

A trait that helps a living thing survive in its environment

Sticky tree sap that is hardened
